

Playground catalog

A playground is a universal solution for children's fun. Thanks to its modular construction and easy assembly and disassembly system, you can easily adapt it to your needs and space. High-quality materials ensure a long life and resistance to children's mischief :-)

Practical, quick, and clean project

The playground is delivered in prefabricated sections, or panels, with play components such as tunnels already built-in. Project involves connecting the panels, and slides and other components are simply screwed in place. Finally, the climbing cylinders and other hanging components are secured, and the foam mats are placed within the playground.

The structure is prefabricated

Entire panel sections are welded together in production, covered with soft safety foams, and then a high-quality and durable PVC Taurpaulin material is applied and welded at the ends for maximum strength and protection. Finally, the entire panel is filled with a safety net.

Extra strong materials for hanging modules and net tunnels that can withstand heavy use

All components are manufactured to the highest safety standards, while also ensuring durability and longevity. The suspension systems have a velcro (removable - replaceable) system so that they can be easily reattached in case of misuse.

EN 1176, the standard exceeded by 110%

The ground floor surfaces are made of 5 cm thick foam, covered with washable PVC Taurpaulin, or on higher floors, they are made of boards, foam, and PVC Taurpaulin, ensuring maximum cleanliness, softness, and, above all, maximum safety for children. The structure is covered with soft foams and netted cords. The details are carefully considered in the playground to prevent children's fingers from getting caught, whether they are sliding or climbing.

Easy disproject and zero waste

If you decide to move, relocate, or sell the playground, disproject takes only a few hours and none of the components are damaged. Therefore, there is no need to purchase any new foams, nets, straps, or flooring for reproject.

Manufactured in Europe – fast delivery

The production of panel playgrounds takes place in Europe, guaranteeing fast delivery. Delivery usually takes 3-4 weeks. In the case of public holidays, the delivery time may be extended to 4-5 weeks.
